Introduction

Dear Sir/Madam,

Hereby, I would like to present Eikon Plus, a printing house from Poland. We specialize in short run book printing. We use modern digital printing machines and a well-equipped bindery. Thanks to our high-quality equipment and our skilled, experienced and professional-minded crew, we are able to guarantee a first-rate product in a time-efficient manner and at a competitive price.

Yours faithfully,

Dominik Sieńko

General terms of co-operation

- Signing a contract to co-operate with us you risk nothing while ensuring a high-quality product at a competitive price.
- We take 3-6 working days to carry out the order.
- Regular clients can negotiate their delivery dates directly with us.
- We produce sample copies and ship them to our clients free of charge.
- Upon our client's approval of the test copy, we carry out the order and ship the products to the client.
- Clients make payment upon acceptance of the quality of the product.

Introduction

Eikon Plus printing house has been operating since 1997. We specialize in short-run book printing. We usually deal with runs of 50-1000 units and produce both soft and hardcover books. Our bindery is well-equipped, which makes it possible to carry out complete finishing in-house. We co-operate with the largest publishing houses and top universities in Poland.

Digital colour print

We use modern digital printing machines, OCE 6550 and Xerox 242, which produce prints of the quality comparable to offset. The maximum copy size – 330x480mm; the maximum copy weight – 300g/m². Possible finishing: laminating (matt and gloss), creasing, UV varnishing, etc.

Hamada offset press

Hamada offset press in a machine printing in B3 size. Maximal paper size is 350x505mm and maximal printable area is 305x500mm. Semi-automated plate changing and CIP-3 systems with optical plate punching allow several hundreds sheets to be printed in a short time of around 25 minutes. This machine has a really good performance short-run printing from hundreds to thousands sheets. It is also a perfect complement to non-economical runs in digital printing.

Large-format printing

We own Canon with 6-color pigment ink set printing in the highest photographic quality. It is perfect for printing posters, stickers, images on canvas, etc.

Oce Varioprint 6100

Digital black and white production system for printing books, brochures, etc. with high efficiency and print speed up to 180 images/minute. The machine is capable of simultaneous duplex printing in a single pass resulting practically in elimination of so-called 'rippling effect'. The spectrum of paper types that can be used is wide, starting from 60g up to 300g papers. The machine is also able to automatically insert the color sheets for example. As a standard we print runs of 50 to 500 on the 80g offset paper. We also print on other paper types, like coated papers, both glossy and matt, as well as on fluff paper. We also offer a personalized printing with special offset paints. Digital printing enables preparation of the proof print copies with the quality identical with target run. It also allows significant decrease of very high book storage costs. The quality of the books

printed digitally is not different from the quality of offset-printed books with much lower cost of production

WELCOME TO PLACE ORDERS

2.5 mln
monthly efficiency

References

We print for many well known publishing houses and universities. Our clients are among others:

- Jagiellonian University
 - Agriculture University in Cracow
 - AGH in Cracow
 - Znak publishing house
 - Gerflint - France
 - Alvinus Verlag - Germany
 - Versita publishing house
- and around 50 other publishing houses

We print

- books
- brochures
- leaflets
- flyers
- labels
- business stationery
- business cards
- posters
- others

Bindery

Our bindery is well-equipped allowing for complete in-house finishing. There are specific tools for digital printing enrichment, but also offset printing-related, like B2-sized laminator, Horizon BQ270 book binder for flexicover assembly and set of smaller devices necessary in every printing house.

Time and delivery

An average time for book printing is 3 working days. We pack the books in boxes and secure them on the pallet before further journey. We use service of trusted delivery companies which by default deliver a package within 5 working days within EU.

Exemplary shipping costs:

- Delivery of one standard pallet to the Netherlands - approximately 100-120 EUR.
- Delivery of one package (maximal weight 30kg) to the Netherlands - approximately 50 EUR.
